

# CANSSI ONTARIO STAGE

CANSSI  
INCASS

## »» CALL FOR APPLICATIONS

CANSSI Ontario STAGE is accepting applications for its Training Program on strategic training in advanced genetic epidemiology. This is an excellent, formal and comprehensive program that cross-trains individuals in genetic epidemiology and statistical genetics, at the interface of genetics and population health sciences.

### »» **Deadline: May 1, 2020**

### »» **Eligibility**

- Postdoctoral fellows from [relevant disciplines](#), or
- Full-time University of Toronto Ph.D. students in the second or a later year of their program, who are enrolled in
  - the Division of Biostatistics, or Epidemiology at the Dalla Lana School of Public Health,
  - the Department of Statistical Sciences, or
  - relevant biomedical programs, with a background in human genetics and demonstrated training and strength in quantitative skills

### »» **Benefits**

- A research allowance of up to \$5,000 CAD
- Mentoring by a team of internationally-renowned experts
- Networking at local, national, and international levels
- A curriculum incorporating core, integrative, and cross-disciplinary courses, and leadership training

### »» **Training Environment**

The program is set in a uniquely rich training environment conducive to interdisciplinary research, and which builds on the resources of

- Toronto's critical mass of genetic epidemiologists and statistical geneticists.
- Collaborative team of biomedical scientists from the Toronto Academic Health Science Network
- Three well-established and quantitatively strong University of Toronto graduate programs: Epidemiology, Biostatistics, and Statistics.
